

BIRLA INSTITUTE OF TECHNOLOGY & SCIENCE (BITS) PILANI PRACTICE SCHOOL DIVISION

STUDENT BIO-DATA FOR PRACTICE SCHOOL

Name: ANSHUMAN SINGH

Email: f20240217@hyderabad.bits-pilani.ac.in

Student Id: 2024ADPS0217H

Program: B.E. Mathematics and Computing

CGPA: 8.68

DOB: 09-07-2006

Pan #: N/A

Phone: 8097622762

Address: 3228, Casa Paradiso 2, Sobha City, Thanisandra Main Road
Bangalore, Karnataka, India, 560077

Academic Credentials (On-campus Courses)

S No	Course Name	Grade
1	BIOLOGY LABORATORY	A
2	COMPUTER PROGRAMMING	A
3	DATA STRUCTURES & ALGORITHMS	CR
4	ELECTRICAL SCIENCES	A-
5	ENGINEERING GRAPHICS	A
6	GENERAL BIOLOGY	B
7	LINEAR ALGEBRA AND ITS APP	C
8	MATHEMATICS I	A-
9	MATHEMATICS III	B-
10	NUMERICAL ANALYSIS	CR
11	OBJECT ORIENTED PROGRAMMING	A-
12	PRINCIPLES OF ECONOMICS	A-
13	SCIENTIFIC COMPUTING LAB	CR
14	TECHNICAL REPORT WRITING	A-
15	WORKSHOP PRACTICE	A

S No	Course Name	Grade
16	CHEMISTRY LABORATORY	A
17	CRIME AND NEW MEDIA	A-
18	DISCRETE MATHEMATICS	B-
19	ELEMENTARY REAL ANALYSIS	B-
20	ENVIRONMENTAL STUDIES	CR
21	GENERAL CHEMISTRY	A-
22	MAIN CURRENTS OF MOD HIS	CR
23	MATHEMATICS II	B
24	MECH OSCILLATIONS & WAVE	A-
25	NUMERICAL OPTIMIZATION	CR
26	PHYSICS LABORATORY	A
27	PROBABILITY & STATISTICS	A
28	STOCHASTIC CALCULUS & APP TO FIN	CR
29	THERMODYNAMICS	A-

On-campus projects/other projects

- LiveMart -- Local Marketplace Platform
Developed a full stack web application connecting consumers with nearby retailers and wholesalers for seamless local commerce
- Built a responsive frontend using React and implemented backend services with Node.js using PostgreSQL for efficient data management

- Integrated Google account authentication for secure and convenient user login and PayUMoney payment gateway for smooth online transactions
- Implemented key features including product listings search and filtering and real time inventory updates
- Focused on performance scalability and delivering an intuitive user experience for both buyers and sellers

Software & Programming Skills

- Proficient in C
- Python
- and Java. Experienced in web development using React
- Node.js
- HTML and CSS. Skilled in data analysis and machine learning using NumPy Pandas and PyTorch. Familiar with MySQL for database management and basic PHP for backend development. Comfortable working in Linux and Windows environments. Comfortable in collaborating using Git

Co-Curricular Activities

- Facial Expression Recognition Model
Developed an image based facial expression recognition system using Python leveraging PyTorch with CUDA acceleration for efficient model training and inference
- Utilized OpenCV for image processing and feature extraction along with NumPy and Pandas for data preprocessing and analysis
- designed and trained a deep learning model to accurately classify facial expressions from input images focusing on optimizing performance and computational efficiency

Extra Curricular Activities

- Member of Matrix Club actively contributed to technical initiatives including development of a machine learning based facial expression recognition project
- Led the LiveMart project team as part of an academic graded project coordinating development efforts and ensuring effective collaboration across frontend and backend components

Professional Interest

- Machine learning
- Artificial intelligence
- Web development and related technologies

Objective of Pursuing Practice School

Seeking to improve collaboration and teamwork skills while gaining practical experience in a professional office environment, aiming to apply academic knowledge to real world problems and enhance problem solving abilities, develop effective communication and time management skills, understand industry practices and workflows, and build a strong foundation for future professional growth

Any other information

- Strong problem solving and analytical thinking
- Quick learner with ability to adapt to new technologies
- Effective team collaboration and communication skills
